ABHISHEK KUMAR

Software Engineer | Backend & Full-Stack Developer
Unnao, India | 6389831378 | abhishek638983k@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Backend-focused Software Engineer and Computer Science diploma student with hands-on experience building and deploying full-stack web applications using JavaScript, Node.js, Express.js, MongoDB, and SQL. Strong foundation in Data Structures & Algorithms with 400+ LeetCode problems solved. Experienced in REST API design, JWT/Passport.js authentication, authorization, database modeling, and AI API integration (Google Gemini). Seeking a Software Engineer, Backend Developer, or Full-Stack Developer internship or entry-level opportunity.

TECHNICAL SKILLS

Programming Languages: C++, JavaScript, Python, SQL
Frontend: HTML5, CSS3, JavaScript, React.js, EJS
Backend: Node.js, Express.js, REST APIs, Middleware
Databases: MongoDB, Mongoose, MySQL, SQL
Authentication & Security: JWT, Passport.js, Session-Based Authentication, Authorization
AI / API Integration: Google Gemini API, REST API Integration
Tools & Platforms: Git, GitHub, VS Code, Docker

PROJECTS

LifeXP - Gamified Productivity Platform

Tech Stack: *JavaScript, Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT Authentication*

- Designed and developed a gamified productivity platform that converts real-world tasks into challenges with XP, levels, streaks, and leaderboards.
- Built a responsive vanilla HTML/CSS/JavaScript frontend integrated with a Node.js/Express backend through REST APIs.
- Implemented JWT-based authentication and authorization to secure protected API routes and manage user sessions.
- Integrated the Google Gemini API to dynamically generate challenges while keeping API keys server-side for security.
- Developed challenge workflows and social features including XP tracking, category-based challenges, leaderboards, friend requests, and user statistics.
- Deployed frontend and backend as independent services connected through API-based communication.

Frontend Repo | Backend Repo | Live Demo

TempChat - Temporary Messaging Platform

Tech Stack: *Node.js, Express.js, MongoDB, Mongoose, EJS, JavaScript, Authentication*

- Developed a server-rendered temporary messaging platform allowing users to communicate without sharing personal contact information, using Express.js, EJS, and MongoDB/Mongoose.
- Implemented authentication, authorization, and friend-request functionality to manage user connections.
- Engineered configurable message and chat deletion behavior, including a 2-hour automatic deletion window.
- Designed backend routes and database models to manage users, friendships, and conversations.

GitHub Repo | Live Demo

Airbnb-Style Booking Platform (In Development)

Tech Stack: *Node.js, Express.js, MongoDB, Mongoose, Passport.js, Joi, EJS, EJS-Mate*

- Developing a full-stack accommodation-booking platform inspired by Airbnb, with authentication and authorization using Passport.js.
- Building property listing, review, and session-management features backed by MongoDB models, Joi validation, and server-rendered EJS views.

EDUCATION

Government Polytechnic Unnao

Diploma in Computer Science & Engineering (CSE) | Expected Graduation: 2027 | CGPA: 7.5+
Class XII: 76% | Class X: 80%

CERTIFICATIONS

- Delta Web Development Course - Apna College

ACHIEVEMENTS

- Solved 400+ problems on LeetCode across arrays, strings, linked lists, trees, dynamic programming, and graphs.
- Independently designed, developed, debugged, and deployed multiple full-stack applications incorporating authentication, REST APIs, and AI integration.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Demonstrates strong communication skills in Hindi and English.
- Takes initiative to independently design, develop, debug, and deploy software projects, showing ownership from idea to implementation.
- Actively learns and experiments with emerging technologies and software development tools.

OTHER PROJECTS

PythonIDE - Browser-Based Python IDE

Tech Stack: *JavaScript, Pyodide, Monaco Editor, HTML, CSS*

- Built a browser-based Python IDE that runs code client-side via Pyodide (no backend), with Monaco Editor highlighting and autocomplete.
- Implemented multiple tabs, undo/redo, auto-save, file open/download, shareable links, error highlighting, and Black formatting.

GitHub Repo

Frontend Projects

- Currency Converter: JavaScript app converting between ~200 currencies using current and historical exchange rates.
- Traffic Rush: retro-style browser car-dodging game built with HTML, CSS, and JavaScript, with high-score gameplay.
